

**Senior Environmental Advisor
Harker Substation
Carlisle
Ref: IW-Env**

Job Role:

Taylor Woodrow are looking to recruit a Senior Environmental Advisor to join our team working on the upgrade of a Sub station based in Carlisle. Reporting to the Project Director, the Senior Environmental Advisor will be responsible for taking the lead in creating a culture of best practice environmental performance and excellent standards for the duration of the project

Duties:

- Acting as the environmental lead on the project with the full support of our Head of Environment
- Provide a point of contact between the site and design teams
- Attend client and subcontractor meetings
- Assist with production and review of methods statements and risk assessments
- Collate subcontractor information from site and relay the data back to our central team to assist with monthly sustainability reporting
- Undertake Environmental inspections and audits
- Provide environmental advice with regards to, legal compliance and construction to the survey team and its subcontractors
- Monitor contractors to ensure effective delivery of contracts
- Co-ordinate and liaise with the Design Joint Venture to ensure the timely exchange of environmental assessments and specialist resources in line with the programme of works
- Review and input into project work package plans and task briefs where required
- Attend consultations with local authorities, local enquiries and other statutory bodies where required
- Record and report all incidents and instigate any corrective actions required

Person Specification

- Formal qualification in an environmental subject
- Previous experience gained as an Environmental Advisor
- Knowledge of construction methods, trades, plant, equipment, and practices, and, in particular the environmental impact associated with each.
- Previous site experience is desirable
- Awareness of all current and future environmental legislation and a working knowledge of applicable health and safety legislation is essential
